ANACOMP, INC.

1992 To 1995

Position: National Director of DCCS Center Support / Senior Systems Engineer

Responsible for Novell network and Data Center Control System (DCCS) for over 51 COM centers across the United States. Managed team for 24 x 7 x 365 national support system. Developed specifications for engineering development of DCCS system and dictated path for future support processing. Developed international electronic data warehouse. Provided support for network systems in Canada, Wales and Japan. Worked with team support on Hewlett Packard 9000 at corporate headquarters.

Greatest Achievement:

National TIGER team leader to implement 30 Anacomp DCCS COM centers in a 120 day period across the United States. Managed center implementation including cable distribution / layout, implementing IPX based Novell network and then attaching Datagraphix XFP-9000 COM machines via a separate TCP/IP based OS/2 COMNET system . These centers will generate over 420 million dollars of revenue for Anacomp per annum.

BELL INDUSTRIES

1991 To 1992

Position: Senior Systems Engineer

Work with sales department to develop project specifications and create client proposals. Design cable distribution systems and pass on to contractor for installation. Install Novell NetWare networks and install and maintain a large arena of industry hardware, software applications and management software. Certified technician on all high end servers to include Compaq, Hewlett Packard and IBM. Also became technician repair certified on all IBM and Compaq workstations and Hewlett Packard / Lexmark printers.

Greatest Achievements:

Dow Elanco Corporate Center Project

Team leader responsible for moving 850 microcomputers and 150 printers from multiple locations to new corporate center. Add network card, setup for Novell NetWare and install company standard software on each IBM and Mac moved. Teams worked 12 hour shifts (24 hours, Mon-Fri) and completed project 15 days ahead of contract date.

Lilly Corporate Center Project

Developed support help desk program to serve the entire Financial Systems division of Lilly. Created procedures that defined a standard set of rules for hardware and software, and documented each piece of application software for DOS, Windows, OS/2 and Mac computers. Also documented and supported department data-highway including Token Ring, Ethernet, AppleTalk and 3270/5250 communications. Created call tracking system using Filemaker Pro (DOS/Macintosh platforms). Program tracks internal trouble calls, project research requests and physical inventory.

ZENITH DATA SYSTEMS

1987 to 1991

Position: Corporate Sales / Master Systems Engineer / Associate Manager

Joined ZDS in corporate sales. By consistently exceeding sales goals, was advanced to Associate Manager responsible for corporate sales, retail sales and service operations. Management responsibilities included daily retail operations management, establishing and managing multiple marketing projects and training program development. Service responsibilities included computer setup and repair, Novell NetWare installation, onsite and telephone support for key corporate clients, and managing service inventory. Became one of the first one hundred Novell CNE's in the United States.

Greatest Achievements:

Member of two person team for the development of the State of Indiana and Naval Avionics Center Quantity Purchase Agreements. Designed help desk program to provide turnkey support to the QPA client base. QPA team generated over 2.1 million dollars of sales and services by the end of the first quarter of program.
